

Milestone Report

Nov 21 2025

L04 - SegFaults

01

PROJECT OVERVIEW

Activity Movement

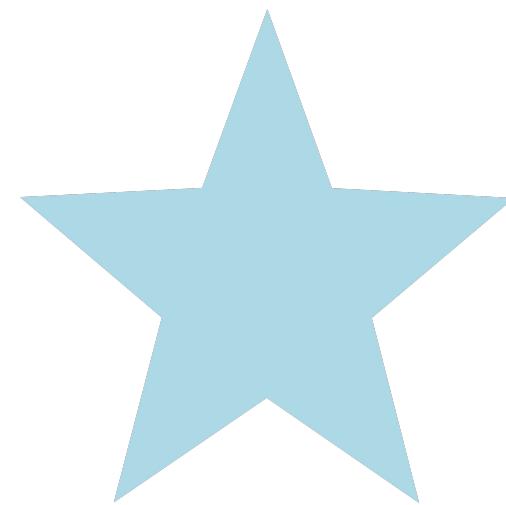

Moved Earlier: None

Moved Later Within Milestone: Final polishing (3.2), hosting tasks

Moved to Next Milestone: Software testing tasks (4.1–4.3)

Archived / Removed: None

Reason: Increased backend workload + integration complexity

Comments

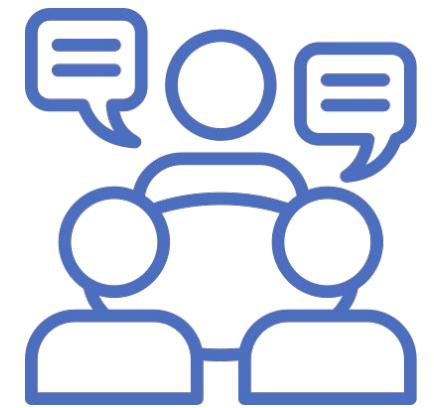

Our Risks

Schedule Risk

Backend integration took longer than estimated.
May push testing into next milestone.

Technical Risk

More features added → higher chance of bugs.
Need stronger testing + consistent code reviews.

Dependency Risk

Team tasks overlap → backend must finish before frontend testing.

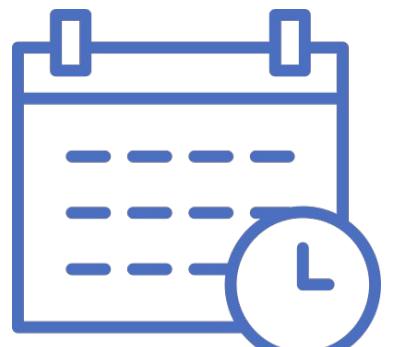

Our Issues

Delays in Backend Completion

Integration took extra days.

Limited Testing Coverage

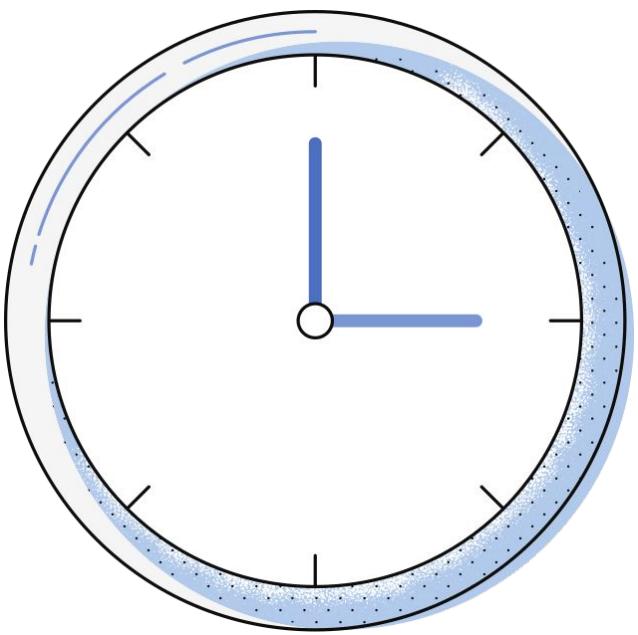

Testing scheduled but not executed this milestone.

Deployment Setup Issues

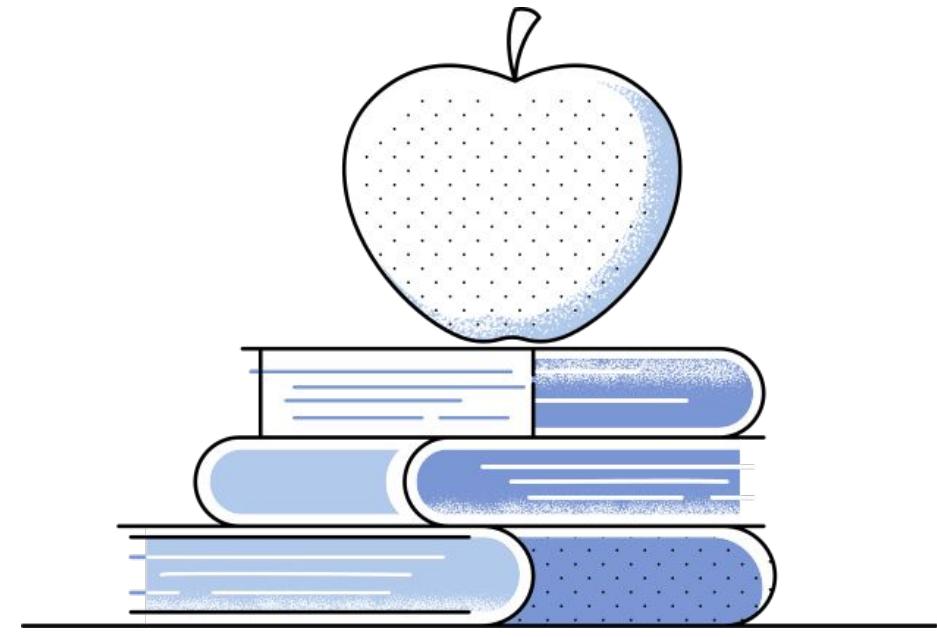

Hosting complications → works, but is currently limited

Deliverables

Completed (Pass):

- Backend Primitive (2.3)
- Full stack integration (2.4)
- Multi-page functionality (2.2)
- Front end primitive (2.1)

Conditional Pass:

- Final polishing (3.2)
- Deployment configuration (2.6)
- Polish at a higher level (2.5)

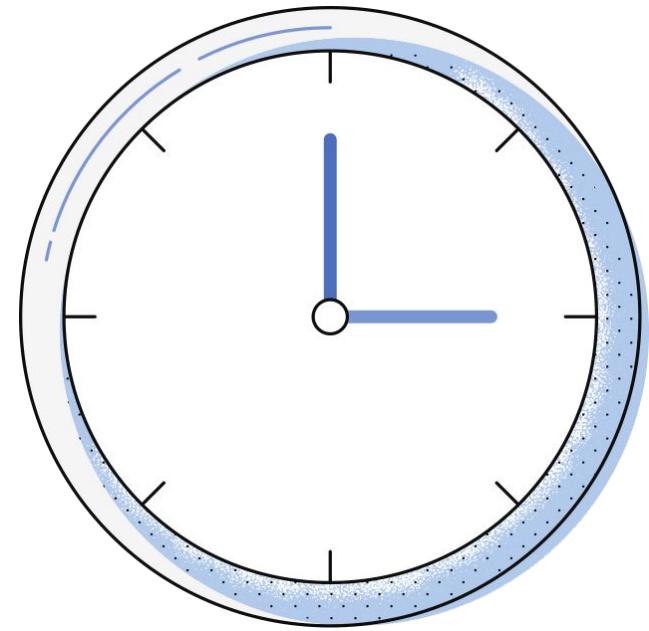

Fail (Moved):

- Testing tasks (4.1–4.3)
- Testing Report (4.4)

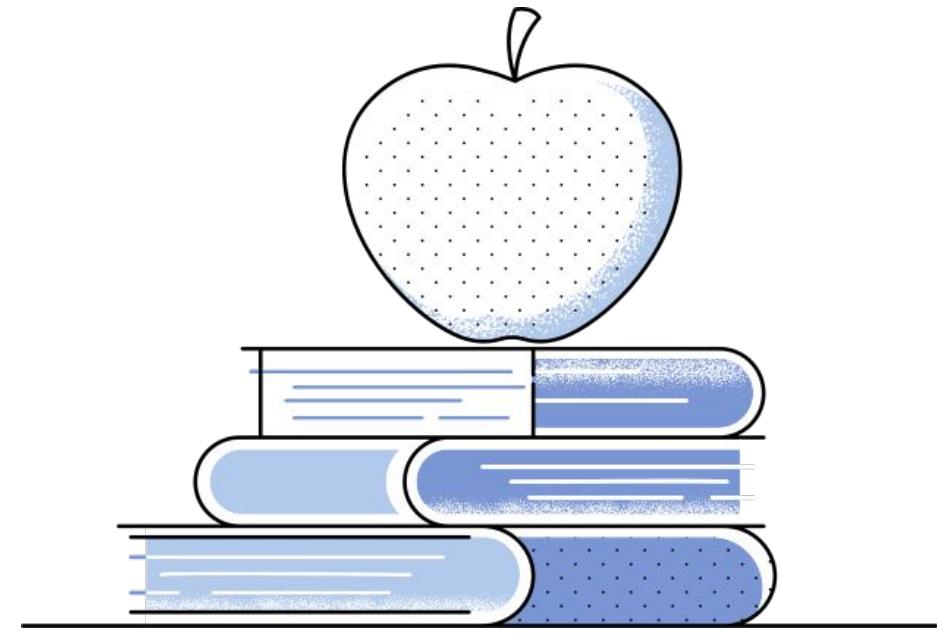

02

Review Process

How we Review

- All group members review all committed code
- New code must be comprehensible and well thought out

Pass: Works to all group members' expectations, exceeds them

Conditional Pass: Below expectations, but serviceable enough to add to codebase. May need changes later on.

Fail: Entirely incomplete, does not function

Pass/ Conditional Pass / Fail

Pass

Backend routes implemented +
functional and fully integrated
with frontend.

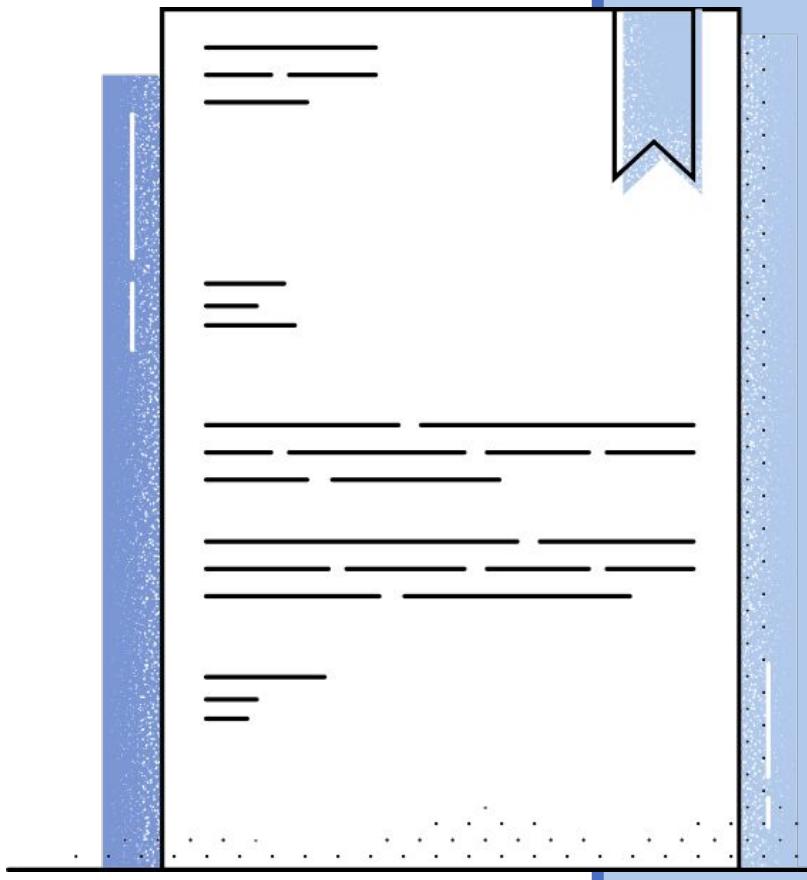

Conditional Pass:

Deployment works but missing
documentation

Fail:

Testing not completed this milestone

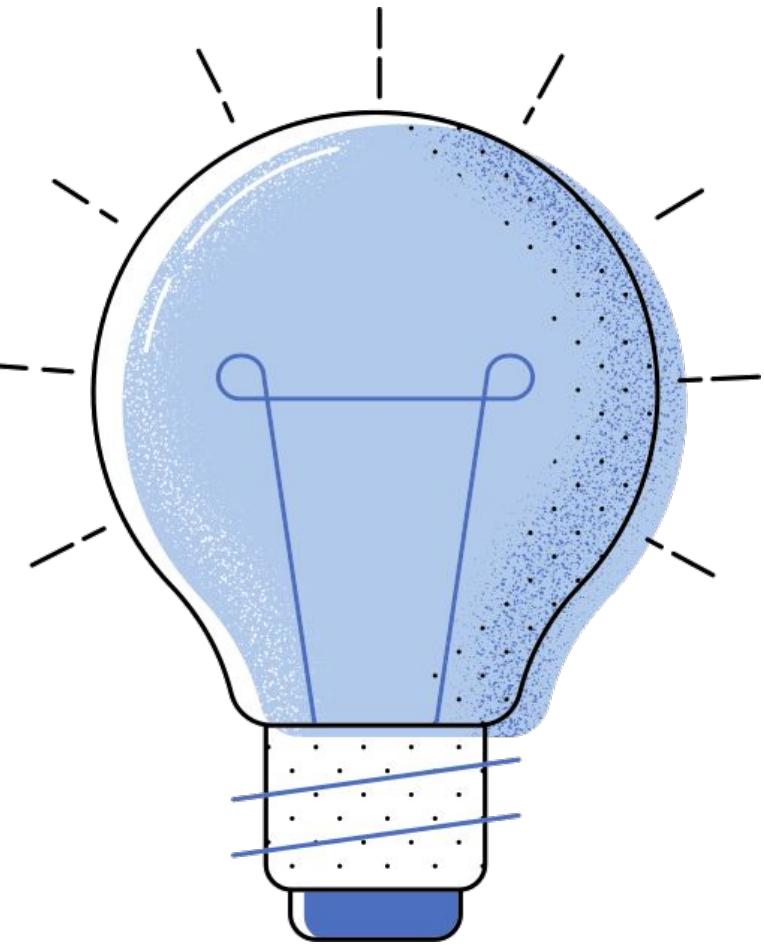

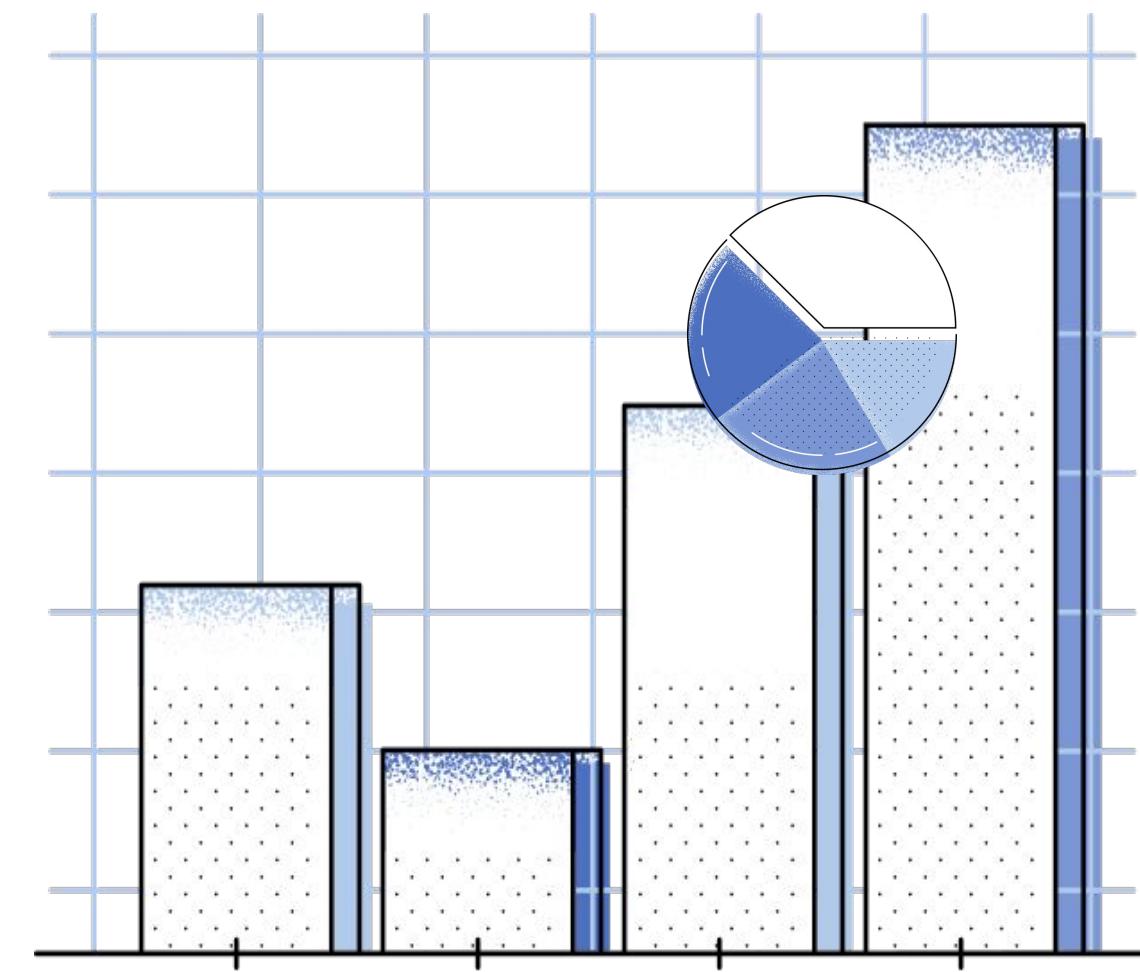

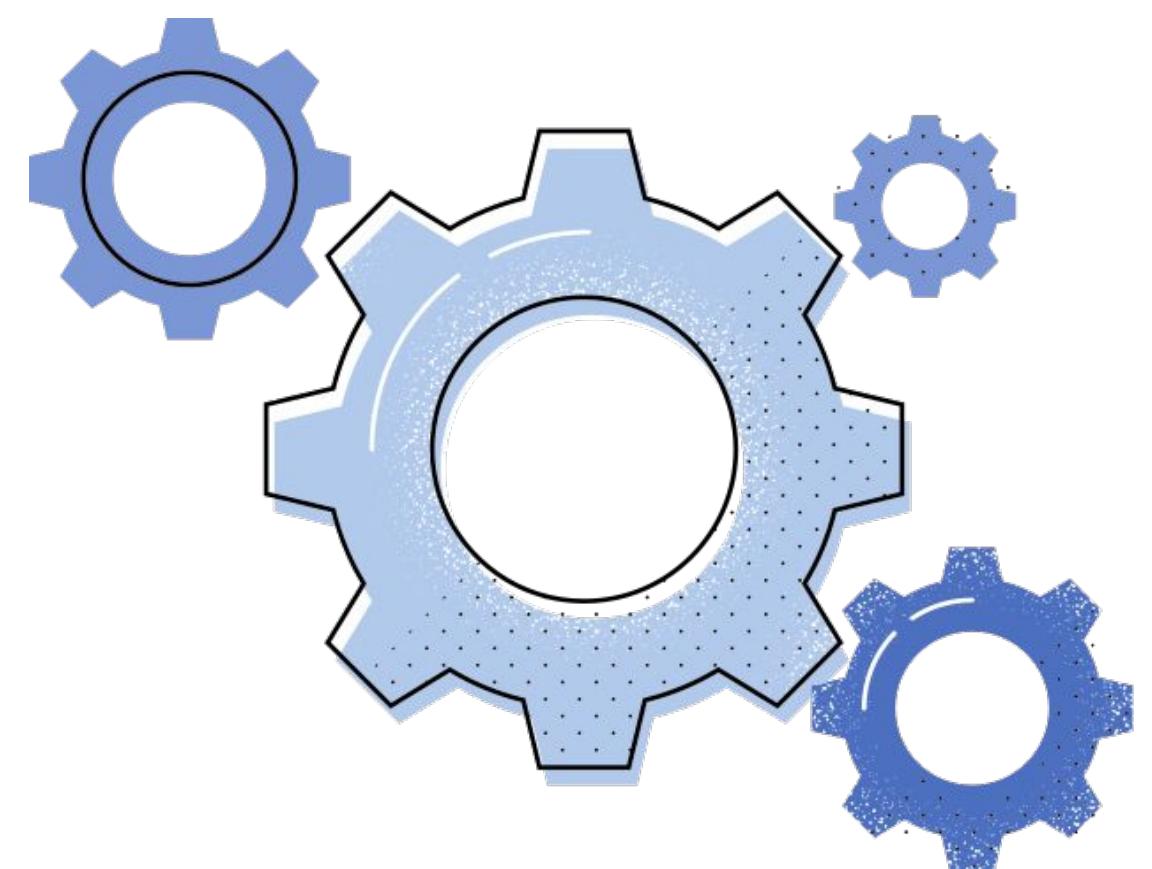

03

Project Status Summary

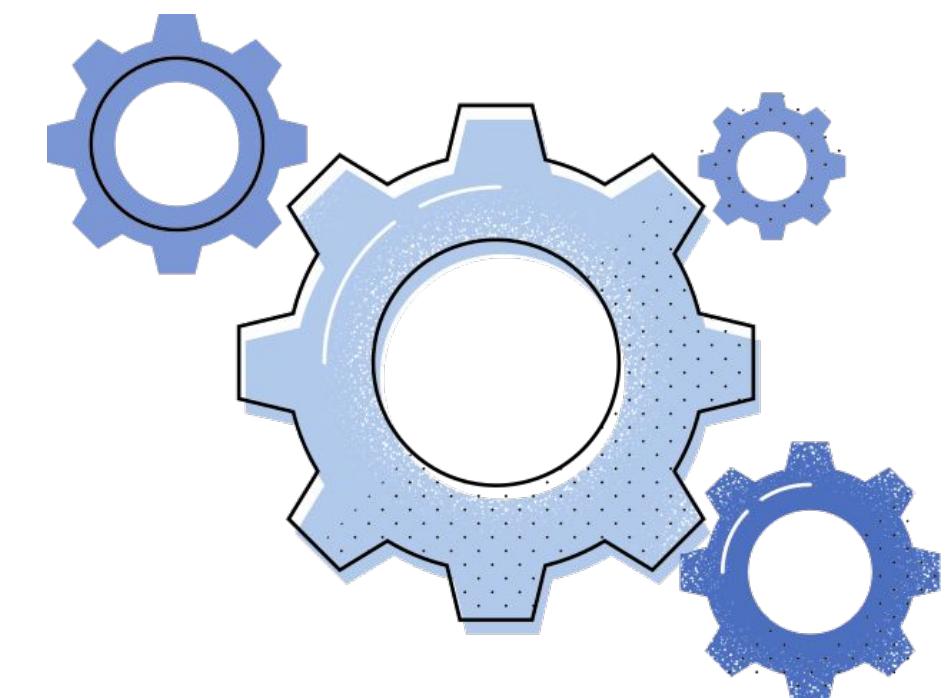

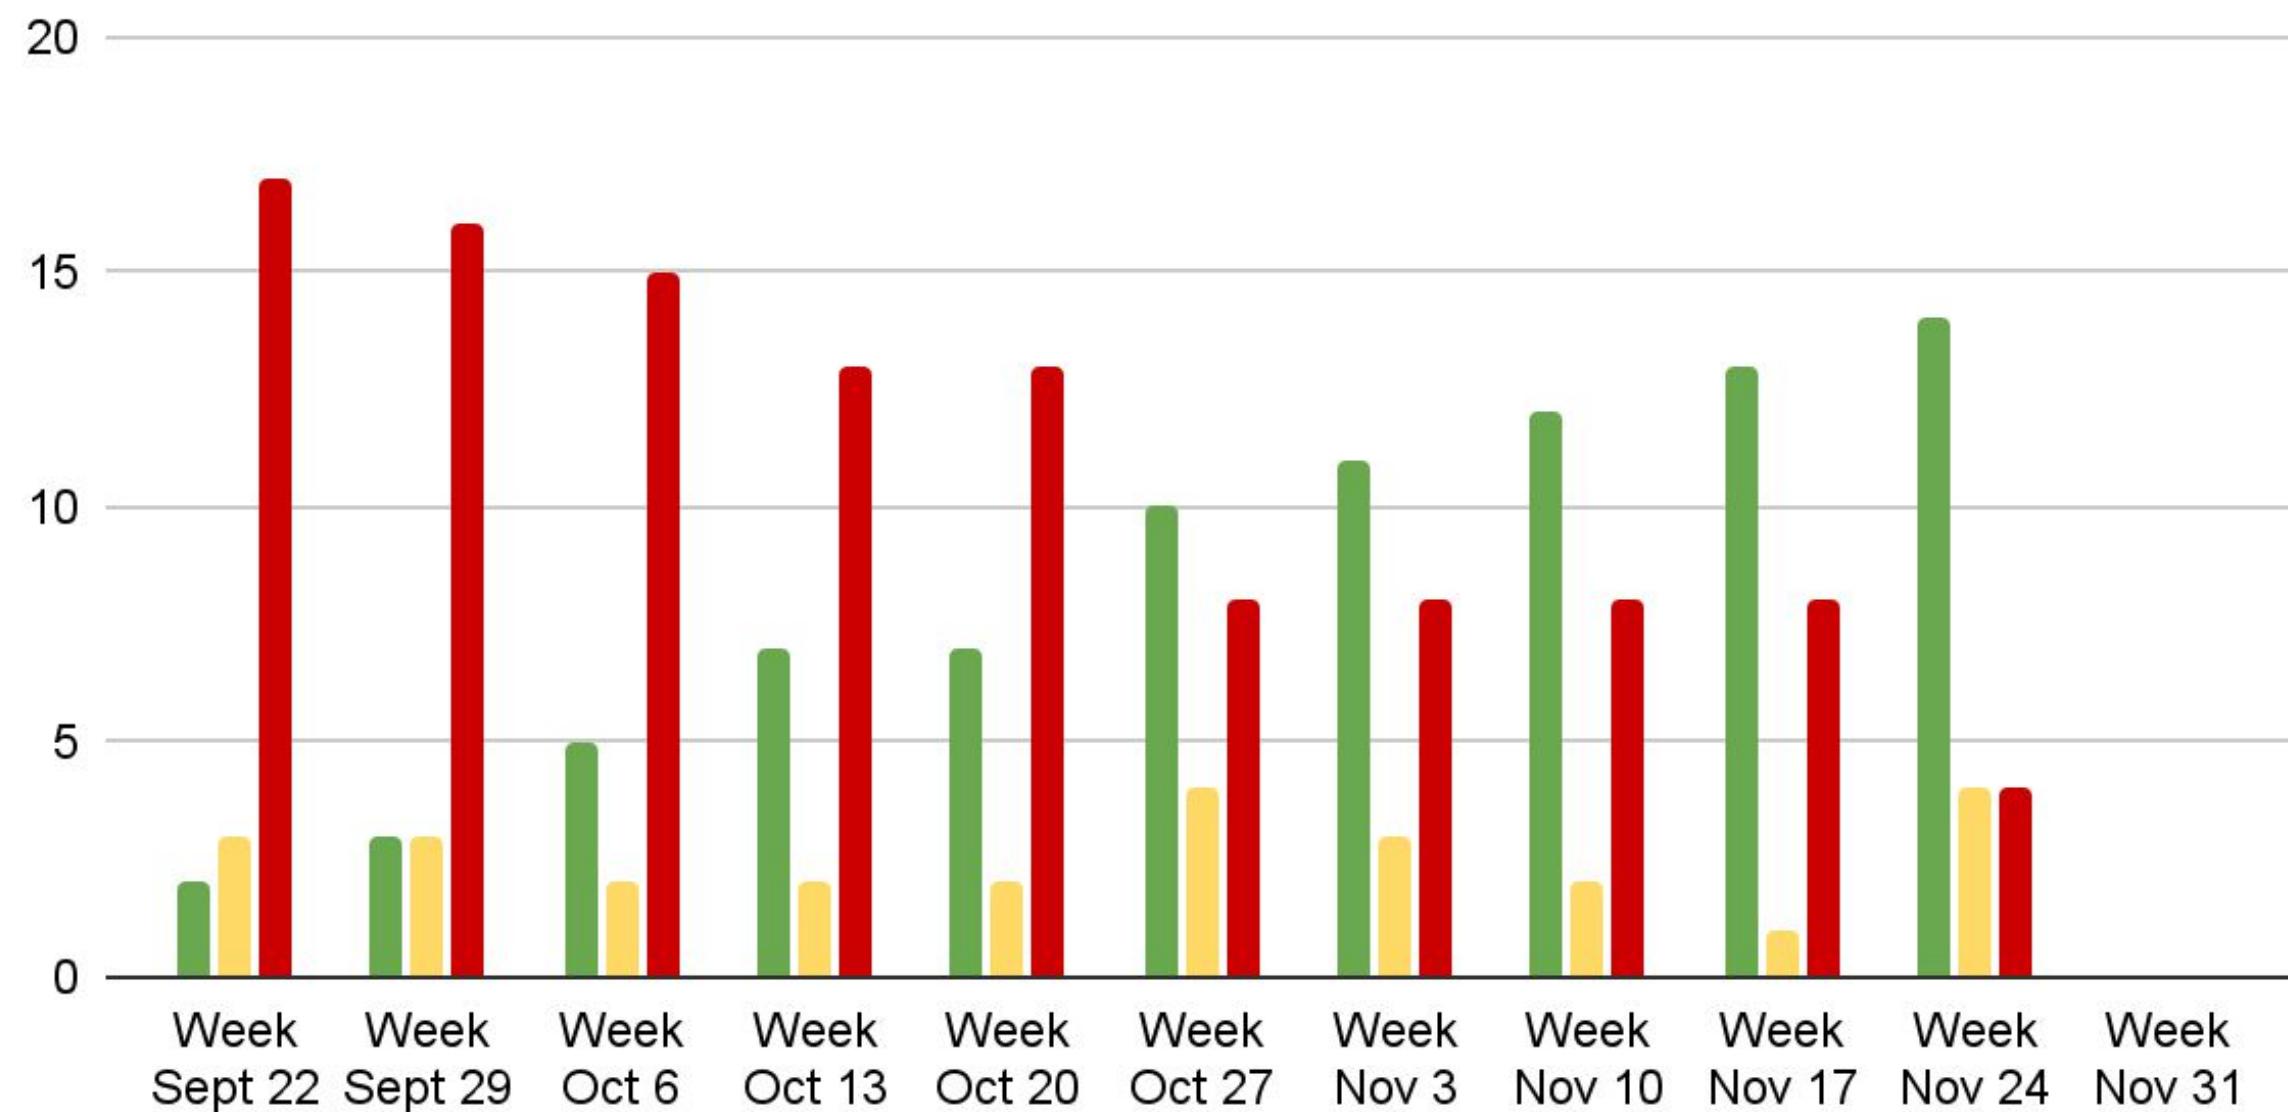

85%
Completed

Task Progress Chart:

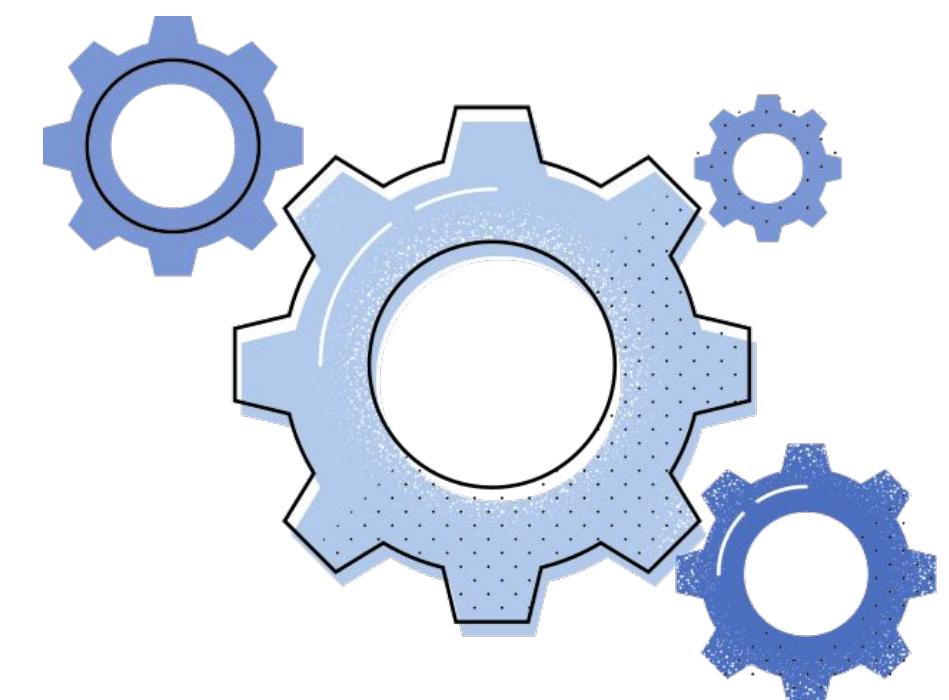

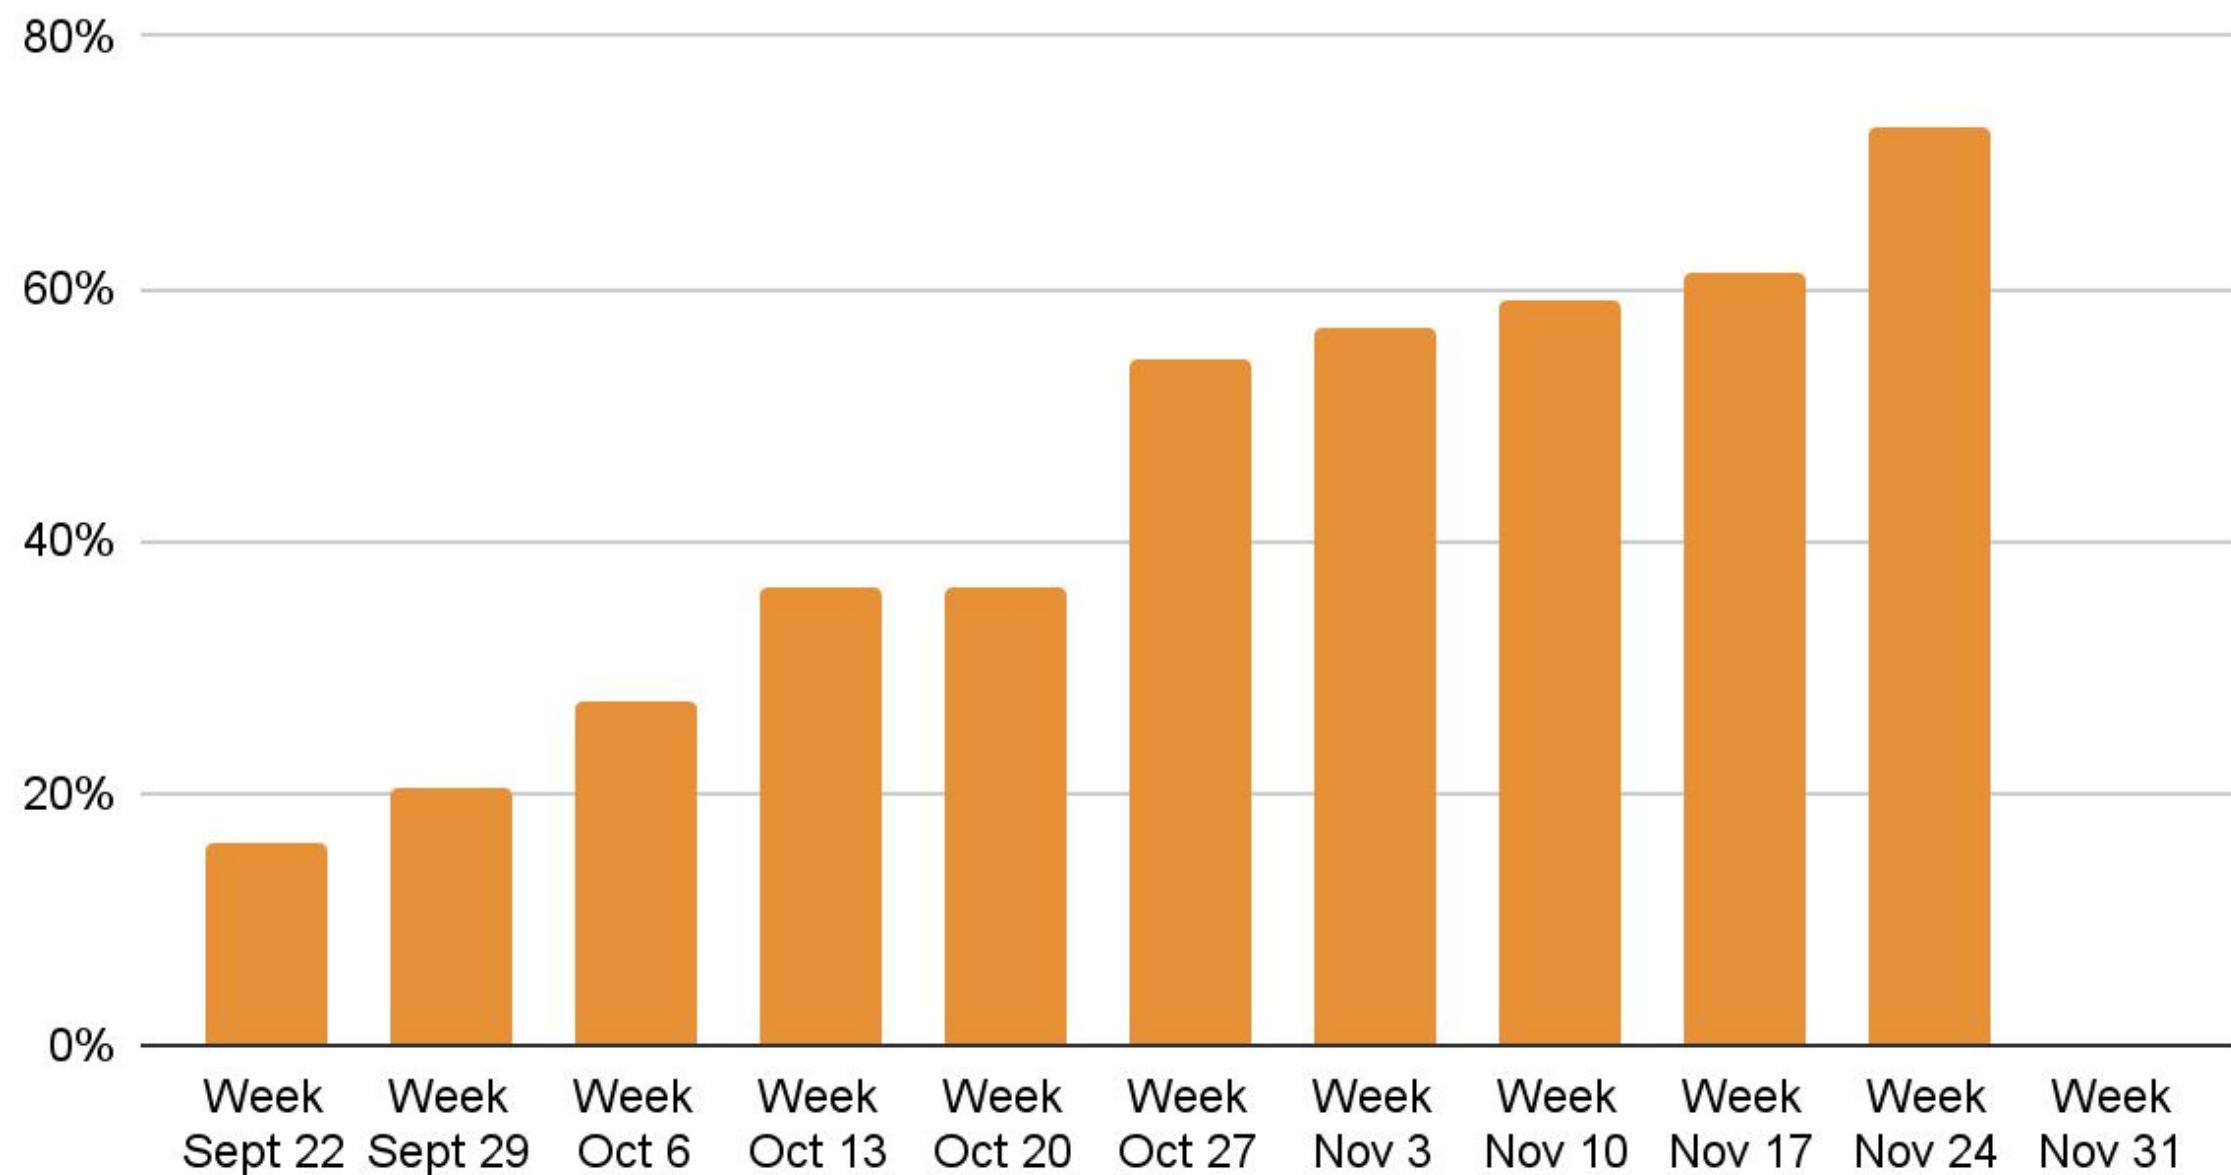

Weekly task progress

Pass (Complete) Conditional Pass (In Progress) Fail (Incomplete)

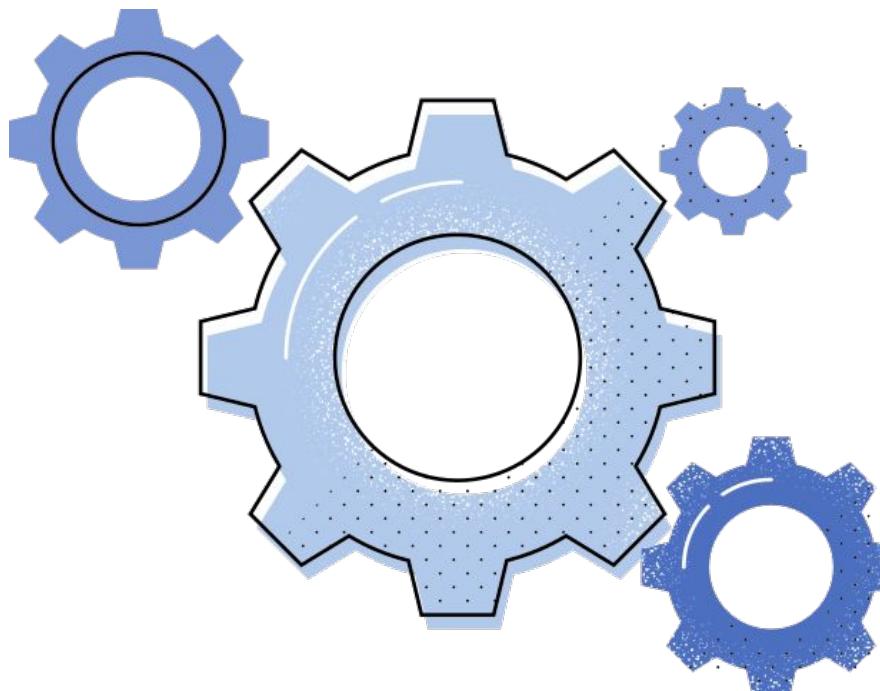

Percent Complete Chart:

Project Completion Percentage Estimate:

What we've learned

- 1. Track risks/issues more frequently; update Smartsheet weekly.**
- 2. Underestimating backend workload delayed testing.**
- 3. Need clearer task ownership & earlier integration checkpoints.**

THANK YOU
